Introduction.

Atlasco Constructional Engineers Limited are specialists in the design and fabrication of structural steelwork and all types of cladding systems.

Founded in 1954, Atlasco Constructional Engineers became incorporated in 1959 as a UK Limited Company.

The present offices, fabrication and painting facilities located in Chesterton, Newcastle-under-Lyme, Staffordshire, were established in 1974 and have undergone extensions and upgrading with the growth and continued development of the company over the subsequent years.

We specialise in the design, fabrication and erection of all types of steel structures and associated cladding systems, all of which are carried out in house. This gives our customers the benefit of our experience and detailed knowledge of the interaction between the structural frame and cladding.

We carry out a wide range of contracts in both size and value from £5,000 to £1,500,000 in the following market sectors.

- City Centre & Retail
- Commercial Offices
- Education
- Health
- Industrial
- Leisure
- Residential & Hotels
- Warehouse & Distribution

Structural Steelwork.

We specialise in the design, fabrication and erection of all types of steel structures including:

- Small, Medium & Large span single and multi-span portal frames.
- Low rise (up to 5 storey) post and beam, braced and/or rigid jointed structures.
- Trussed or lattice structures.
- Most forms of building steelwork.

Design and Detailing.

Over the past 25 years, we have invested heavily in Computer Aided Design (CAD) and detailing which is all carried out in house.

- CSC Fastrak Building designer Suite (3D Design)
- Tekla Structures
- TurboCAD Professional

Cladding.

Be it a new build or the refurbishment of an existing building, we can offer our clients the benefit of over 50 years of knowledge and experience in the design and installation of all types of roof and vertical cladding systems.

Our in house cladding department is well versed in working on both built-up and composite systems. From design through to installation, we ensure that the design meets all the latest building regulations on thermal performance, fire certification, acoustics and air tightness.

All our cladding installers are certified to the latest CSCS standards, to ensure that workmanship is of the highest standard

We can also offer a full safety net, scaffolding and fall arrest system installation service by qualified contractors.
